DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/17/07 has been entered.

In response to the Final Office Action mailed on 04/20/2007, applicants' filed an RCE received on 10/22/07 is acknowledged. Said RCE amended claims 1, 7, 9, 16, 40 and canceled claims 6, 10-15, 18-36, 38 and 39. Thus, claims 1-5, 7-9, 16, 17, 37 and 40 are pending in the instant Office Action and are subject to restriction.

Objections and rejections not reiterated from previous action are hereby withdrawn.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 7, 8 and 40, drawn to an drawn to polynucleotide comprising the nucleic acid sequence of SEQ ID NO: 6 encoding a phospholipase A2 γ polypeptide, expression vectors, host cells and the method of making polypeptide, classified in class 435, subclass 198.
- II. Claim 9, drawn to an antisense sequence, which specifically hybridizes to SEQ ID NO: 6, classified in class 536, subclass 23.1.
- III. Claim 16, 17 and 37, drawn to a vector comprising the nucleic acid sequence of SEQ ID NO: 1 suitable for generating a transgenic mouse and to a method of preparing transgenic mouse, classified in class 800, subclass 21.

Art Unit: 1652

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are drawn to products and are patentably distinct from each other. The polynucleotides of groups I-III are chemically unrelated, do not require each other for practice; have separate utilities. For example the use of groups I polynucleotide comprising the nucleic acid sequence of SEQ ID NO: 6 encoding a phospholipase A2 γ polypeptide, expression vectors, host cells and the method of making polypeptide and the antisense molecule of group II that comprises the complement of the polynucleotide sequence encoding the coding sequence of group I and hence structurally different. Similarly, the vector comprising the nucleic acid sequence of SEQ ID NO: 1 suitable for generating a transgenic mouse and to a method of preparing transgenic mouse of group III also comprises promoter elements that are suitable and active in a transgenic mouse and is structurally different from the heterologous promoter that drives the gene of interest in group I polynucleotide group and are subject to separate manufacture, use and sale. The groups have acquired a separate status in the art and separate fields of search.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1652

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Effective November 1, 2007, if applicant wishes to present more than 5 independent claims or more than 25 total claims in an application, applicant will be required to file an examination support document (ESD) in compliance with 37 CFR 1.265 before the first Office action on the merits (hereafter "5/25 claim threshold"). See Changes to Practice for Continued Examination Filings, Patent Applications Containing Patentably Indistinct Claims, and Examination of Claims in Patent Applications, 72 Fed. Reg. 46715 (Aug. 21, 2007), 1322 Off. Gaz. Pat. Office 76 (Sept. 11, 2007) (final rule). The changes to 37 CFR 1.75(b) apply to any pending applications in which a first Office action on the merits (FAOM) has not been mailed before November 1, 2007. Withdrawn claims will not be taken into account in determining whether an application exceeds the 5/25 claim threshold. For more information on the final rule, please see <http://www.uspto.gov/web/offices/pac/dapp/opla/presentation/clmcontfinalrule.html>.

In response to the restriction requirement set forth in this Office action, applicant is required to file an election responsive to the restriction requirement. Applicant may not file a suggested restriction requirement (SRR) in lieu of an election responsive to the restriction requirement as a reply. A SRR alone will not be considered a *bona-fide* reply to this Office action.

If applicant elects an invention that is drawn to no more than 5 independent claims and no more than 25 total claims, applicant will not be required to file an ESD in compliance with 37 CFR 1.265 that covers each of the elected claims. If the elected invention is drawn to more than 5 independent claims or more than 25 total claims, applicant may file an amendment canceling a number of elected claims so that the elected invention would be drawn to no more than 5 independent claims and no more than 25 total claims.

If the restriction requirement is mailed on or after November 1, 2007, applicant is also required to file an ESD in compliance with 37 CFR 1.265 that covers each of the elected claims, unless the elected invention is drawn to no more than 5 independent claims and no more than 25 total claims taking into account any amendment to the claims. To avoid the abandonment of the application, the ESD (if required) and the election must be filed within **TWO MONTHS** from the mailing date of this Office action. The two-month time period for reply is extendable under 37 CFR 1.136.

If the restriction requirement is mailed before November 1, 2007, the election must be filed within **ONE MONTH** or THIRTY DAYS, whichever is longer, from the mailing date of this Office action. The time period for reply is extendable under 37 CFR 1.136. Furthermore, if the elected invention is drawn to more than 5 independent claims or more than 25 total claims taking into account any amendment to the claims, the Office will notify applicant and provide a

Art Unit: 1652

time period in which applicant is required to file an ESD in compliance with 37 CFR 1.265 covering each of the elected claims or amend the application to contain no more than 5 independent elected claims and no more than 25 total elected claims.

Final Comments

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

To insure that each document is properly filed in the electronic file wrapper, it is requested that each of amendments to the specification, amendments to the claims, Applicants' remarks, requests for extension of time, and any other distinct papers be submitted on separate pages.

It is also requested that Applicants identify support, within the original application, for any amendments to the claims and specification.
